

Designed with the environment in mind

Purlogix™ systems are designed to meet the criteria of the environmental and sustainability programs being implemented in today's workplace.

Our systems provide an endless, renewable supply of environmentally friendly, pure, fresh and healthy drinking water.

Our multi-stage purification process removes contaminants and delivers delicious piping hot or ice cold water through a sanitary electronic dispense port.

The sleek and stylish design fits into any office decor.

Flexible filtration options ensure that there is a Purlogix™ model to suit any requirement.

The Logical Choice!

A Purlogix™ system is the ideal addition for the office to provide a pure and healthy drinking water source.
